ABOUT ME

I'm a 25-year-old FullStack developer from Bet-Shemesh, looking for a full-time developement position.

I enjoy music and art, and loved being a youth guide (informal education) for five years (18 - 23).

For the last two years I've been studying CS at the Open University of Israel, while also practicing programming.

Learning alone and with friends was alot of fun, but now I'm looking forward to work with good people on a great product!

Tic Tac Toe

The Act of Time

PERSONAL EXPERIENCE

Tic Tac Toe

Designed and Coded a "Tic Tac Toe" game from scratch, as a test-of-skill personal project.

The project was coded with **ReactJs**, **Redux-Toolkit**, **NodeJs**, **express**, **styled-components** and **Joi**, managed and deployed on **Github** via **GitKraken**, and **Github Actions** (CD), and hosted on **AWS** using **EC2** and **Route53**.

I had so much fun working on this project for the last several weeks, and hope you would have just as much fun playing it with friends!

The Act of Time

Initiated and Managed an open-source student's project, creating a browser RPG game using **ReactJs**, **Redux-Toolkit**, **styled-components**, and more.

The Project was a voluntary learning experience in programming, with high technical standards, guided by an experienced fullstack developer.

The Act of Time was an active project for 9 months, and involved 7 CS students, who have formed social connections and evolved professionally, two of which were hired as full-time developers while participating.

EDUCATION

Computer Science B.Sc. student at the **Open University of Israel**, halfway through the degree, with a current average score of **90**.
